

FAQ

“How can I find out how much MetaClinic could save our group?”

We can prepare a MetaClinic Savings Proposal for your group in two weeks or less! Here’s how.

STEP 1:

Release Your Claims Data

Simply contact your TPA/health plan manager and let them know that you authorize the MetaClinic team to receive 2 years of insurance claims data, so we can analyze the overall health of your employee population.

You own this data, and it costs you nothing to request and release it.

If you’re not sure how to handle this, your Bravura representative will be happy to help.

(NOTE: There is no employee-specific information included in this data, so your employees’ confidentiality remains intact.)

STEP 2:

We calculate your savings.

We run your claims data through our proprietary software program to find all the places we can save your organization money on health care while improving the health of your employees.

Then we prepare your custom **MetaClinic Savings Proposal**.

STEP 3:

We present you with the good news.

We’ll bring your custom MetaClinic Savings Proposal to you and show you the **COST SAVINGS GUARANTEE** we will give you with a three-year contract. We will also show you how quickly we can have one or more MetaClinic locations up and serving your employees (sometimes as quickly as 60 days from contract signing!)

It’s that simple.

You have nothing to lose.

Take the first step toward cost savings and healthier employees.

Request your no-obligation MetaClinic Savings Proposal today!
