

FAQ

“Where will our clinics be?”

Simple. Wherever your members live.

Let's see an on-site clinic try that! One of the biggest advantages of the MetaClinic model is that it provides total flexibility and scalability to meet your members' needs. This is especially important because trade unions often have a very geographically-dispersed membership.

Flexible locations

Based on your number of members, and where they live, we will strategically position MetaClinic facilities to ensure that every member has the most convenient access possible.

Scalable

If your membership grows, or expands to another geographical area, new MetaClinic facilities can be added quickly to accommodate the change. And adding facilities does not cost you anything.

On-site clinics don't work for unions

It's a fact. Union members simply won't use a clinic that's 30+ miles away. MetaClinics are established and opened near MANY MORE of your members (we can also serve as extensions of your onsite clinic). Imagine, 80% of your members having access to free primary health care as opposed to merely 40%-50%.

Big improvement.
